

My name is Lindsay White, and I am the CEO of Rother based charity Community Supporters, and education and environmental charity. We have recently been working on a project idea to help deaf children communicate and make friends easier when out and about.

We are working alongside Rother District Council (Rebecca Owen) to install signage boards in selected play areas across the district. These brightly coloured boards will have a selection of easy to learn British Sign Language Signs to help hearing and non-hearing children communicate (I have attached the designs and pricing options).

We have highlighted 5 RDC owned play areas, including one in Battle, but I was wondering if it is possible to open a discussion with yourselves about the possibility of including the play area on the North Trade Road.

Community Supporters are current in the process of grant making and fund raising for this project and hope to also run some promotional events and activities both before and after any installations of equipment.
